

# **Computing Policy**

#### Rationale

At Hawkshead Esthwaite Primary School, we recognise that pupils are living in a rapidly changing world, in which computing is playing an ever-increasing role. We aim, therefore, to equip children with the skills to adapt to new technology and to give them confidence to use computing to further their learning and assist them in everyday life. In doing so, all pupils will have access to computing equipment and resources, according to their ability and age range.

At Hawkshead Esthwaite Primary School, we believe that increased computing skills promote independent learning and gives greater access to a wide range of ideas and experiences. It enhances the quality of children's work across the curriculum and should enhance and enrich the learning process.

### **Aims of Computing Curriculum**

- To develop children's individual computing capability and understanding
- To ensure all children know how to stay safe online
- To enhance teaching and learning in other areas of the curriculum by cross curricular use of computing
- To develop computing as a tool for learning and investigation
- To equip pupils with the confidence and capability to use IT throughout their education, home and further work life.
- To recognize the potential, and deepen the necessity of computing in everyday life
- To stimulate interest in new technologies

### **Implementation of Policy**

• We have used the best research to create a well sequenced and progressive curriculum map containing the key concepts children need to be procedurally fluent and to work and think like computing professionals.

The key concepts in computing which we plan a progression for are as follows:

- Problem solving and logical thinking
- Creative Content
- Digital literacy

At Hawkshead Esthwaite Primary School, to enhance the teaching and learning of all curriculum areas within the school, teachers employ a range of strategies including:

- Demonstrating to the whole class/group using the IWB.
- Discussion with the whole class/group.
- Individual or paired working.
- Collaborative group work.
- Encouraging pupils to demonstrate new skills to others

At Hawkshead Esthwaite Primary School, the computing curriculum incorporates cross curricular links and discrete computing skills. Computing should be taught as part of our creative curriculum, while still teaching the discrete skills required. Children in Key Stage 1 and Key Stage 2 should all spend at least 1 hour per week studying computing. This may well be blocked or taught weekly. Children will spend additional time using computing to support other subjects.

At Hawkshead Esthwaite Primary School we recognise the need for children to understand the purpose of their work and therefore we take every opportunity to share their computing work in school and on the school Facebook page for parental viewing.

At Hawkshead Esthwaite Primary School, the computing curriculum provision covers the following topic areas (across all year groups);

- Text and Multimedia
- Images, Video and Animation
- Sound
- Electronic Communication
- Digital Research
- Data Handling
- Data Logging
- Logo and Control
- Simulations and Spreadsheets
- E-safety

At Hawkshead Esthwaite Primary School, children will be encouraged to evaluate both their work and the computer effectiveness. The nature of computing as a tool means that there will be many opportunities for links with other subjects.

Teachers will plan some activities which emphasise the development of computing capability and others which support the subject being taught.

In order to ensure progression and continuity throughout the school, the school has developed a curriculum map which outlines curriculum coverage, progression and context of computing as a discreet subject and across the curriculum.

### **Expectation in COMPUTING**

#### At the end of KS1 children should:

- Understand what algorithms are; how they are implemented as programs on digital devices; and that programs execute by following precise and unambiguous instructions
- Create and debug simple programs
- Use logical reasoning to predict the behaviour of simple programs
- Use technology purposefully to create, organise, store, manipulate and retrieve digital content
- Recognise common uses of information technology beyond school
- Use technology safely and respectfully, keeping personal information private; identify where to go for help and support when they have concerns about content or contact on the internet or other online technologies.

#### At the end of KS2 children should:

- Design, write and debug programs that accomplish specific goals, including controlling or simulating physical systems; solve problems by decomposing them into smaller parts
- Use sequence, selection, and repetition in programs; work with variables and various forms of input and output
- Use logical reasoning to explain how some simple algorithms work and to detect and correct errors in algorithms and programs
- Understand computer networks including the internet; how they can provide multiple services, such as the world wide web; and the opportunities they offer for communication and collaboration
- Use search technologies effectively, appreciate how results are selected and ranked, and be discerning in evaluating digital content
- Select, use and combine a variety of software (including internet services) on a range
  of digital devices to design and create a range of programs, systems and content that
  accomplish given goals, including collecting, analysing, evaluating and presenting
  data and information
- Use technology safely, respectfully and responsibly; recognise acceptable/unacceptable behaviour; identify a range of ways to report concerns about content and contact.

### **Health and Safety**

At Hawkshead Esthwaite Primary School, equipment is maintained to meet the agreed safety standards.

Age appropriate safety rules are displayed in the learning environment. Food and drink should not be consumed near ICT equipment.

It is the responsibility of staff to ensure that classroom ICT equipment is stored securely and cleaned regularly.

Staff should ensure that the children are aware of the dangers of continuous use (e.g. Eye/wrist strain etc).

An adult should always supervise children when they are accessing information via the Internet. Internet filtering is provided by the Local Authority.

### **E-Safety**

At Hawkshead Esthwaite Primary School, staff and pupils are made aware of the importance of e-safety and sign an acceptable use agreement on entry to school and at Key Stage 2. Staff, pupils or parents with concerns about e-safety are to contact the Headteacher if they have any concerns.

### **Inclusion and Equal Opportunities**

At Hawkshead Esthwaite Primary School, the computing curriculum is concerned with the learning and participation of all students. Teaching is planned with this in mind with teachers/ teaching assistants supporting all students, ensuring good progress is made.

At Hawkshead Esthwaite Primary School, we aim to provide suitable learning opportunities regardless of gender, ethnicity or home background.

Regular assessment of pupil needs and understanding plays a vital role here as does the provision of appropriate resources, the internet and our whiteboards offer a wealth of materials that can be matched to suit individual or group needs, enabling all pupils to develop their computing skills.

At Hawkshead Esthwaite Primary School, the computing subject leader is responsible for

- Overseeing the implementation of the computing curriculum
- Monitoring the learning and teaching
- Ensuring the assessment is relevant and informative
- Making purchasing decisions
- Ensuring all staff are appropriately trained in both COMPUTING hardware and software
- Keeping up to date with developments in computing
- Liaising with the technician
- Observing computing lessons
- Monitoring / supporting computing planning
- Preparing policy documents
- Advising colleagues and helping to develop expertise
- Liaising with the staff team
- Contributing to staff computing INSET training

#### **Assessment**

At Hawkshead Esthwaite Primary School, children should be assessed against their progress in understanding and applying computing against the curriculum map. This will be self-evident from the work produced in a situation where no teacher support is given once a task has been assigned

### **Disability Equality Impact Assessment**

This policy has been written with reference to and in consideration of the school's Disability Equality Scheme. Assessment will include consideration of issues identified by the involvement of disabled children, staff and parents and any information the school holds on disabled children, staff and parents.

Any questions or concerns regarding this policy should be made to Mrs. C. Sharp (Head teacher) or Mrs. S Kirby (Subject Leader)
